# Create dynamic videos for any audience

## Vyond training

Learners need more than static eLearning. They need attention-grabbing courses to pull them away from life's distractions - and animated video is the perfect way to do just that. In this one-day training course, you will learn how to take your eLearning courses to the next level with Vyond.

### Prerequisites

Training sessions are designed for a variety of skill levels. All participants should have basic computer skills and familiarity with some of the more common user interfaces.

The day is interactive and hands-on, therefore, participants are required to use Vyond throughout the training. Please ensure you have a Vyond account before attending training. The free trial has limited functionality and will limit how much you get out of the course.

Vyond is a cloud based software, therefore internet connection is required for the course. Vyond is compatible with Chrome, Edge and Mozilla. If you are using a Mac, please note that Safari is not a compatible browser with Vyond, therefore please download/install an appropriate browser alternative.

**Module 1: All about Vyond**

**Module 2: Getting started**

**Module 3: Vyond system features**

**Module 4: Branding your videos**

**Module 5: Using Vyond to create GIFs**

**Module 6: Exporting GIFs and videos**

**Module 7: Using audio in video**

**Module 8: Advanced Vyond tips & tricks**

**Module 9: Using Vyond with Articulate 360**
