Articulate 360, supported by **Omniplex Learning**

For teams currently using Captivate

Articulate 360, supported by Omniplex Learning, helps Captivate users move from specialist-heavy course production to a more scalable learning creation workflow that the wider L&D team can adopt.

For many L&D teams, the opportunity is not just switching authoring tools. It is creating a faster, more flexible way to build, review, update and deliver digital learning — with fewer bottlenecks and more people able to contribute confidently.

What's inside

Inside this guide, you'll see how the Articulate 360 suite supports different learning creation needs, from rapid responsive courses in Rise to custom interactive learning in Storyline, with Review, Reach, Localization and AI Assistant supporting the wider production workflow.

At Omniplex Learning, we also offer the support to adopt Articulate 360 successfully including licensing guidance, onboarding, certified training and practical enablement for your team

Create faster

Use Rise, Storyline and AI Assistant to support different content needs, from rapid responsive courses to custom interactive learning.

Collaborate more easily

Use Review to keep feedback connected to the course experience and reduce scattered stakeholder comments.

Scale production

Support more content, more contributors, more updates and more languages without adding unnecessary complexity.

Adopt with confidence

Work with Omniplex Learning for licensing, onboarding, certified training, workflow guidance and practical enablement.

Everything you need to create workplace training from the #1 e-learning platform

With Articulate 360's AI-enhanced authoring tools, you can create engaging, interactive content, streamline collaboration across teams, and quickly distribute training at scale. The platform enables creators of any skill level to build beautiful, impactful e-learning.

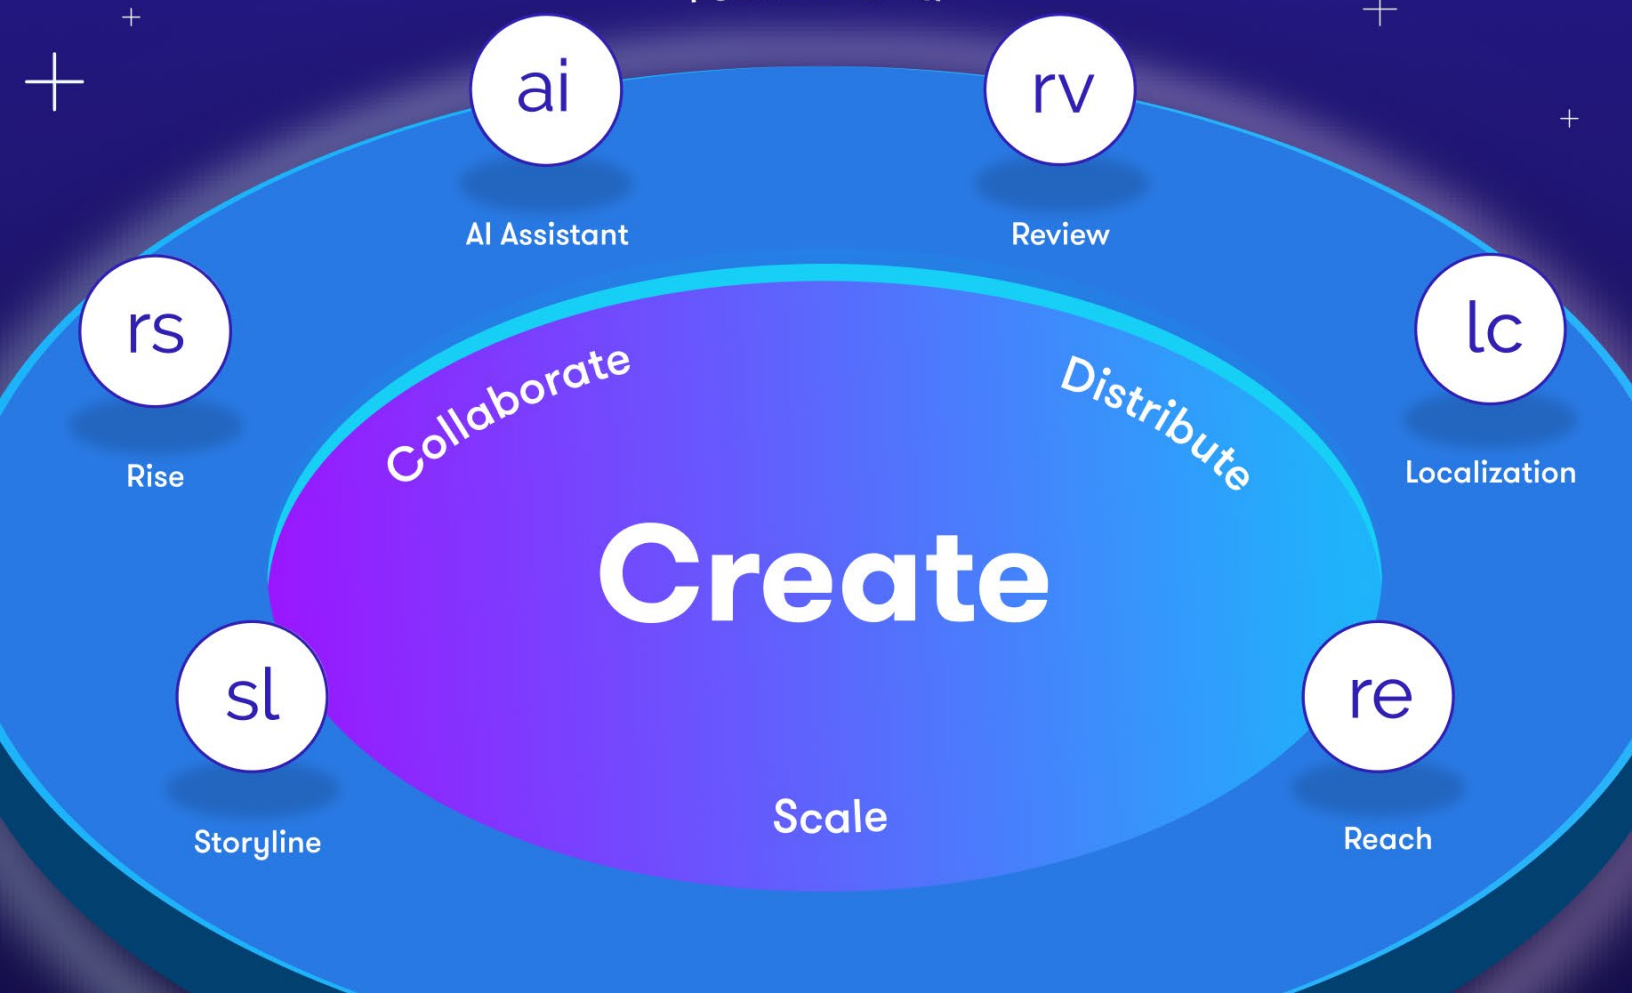

Create course content up to 9x faster with integrated AI

Distribute to any platform or use our integrated LMS

Collaborate simply with in-app feedback

Scale with localized training, supported by enterprise-grade security

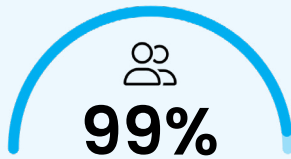

POWERED BY AI

Build training that gets results, with the industry's gold standard

Leaders training today's workforce face mounting pressure to grow skill-building programs while business needs evolve faster than ever. Articulate 360 has everything you need to author beautiful, effective, multi-device courses for any learner.

Over 99% of customers report that courses they have created using Articulate 360 have led to positive business outcomes, such as improved onboarding time, skill development, compliance rate, etc.

Our all-inclusive Articulate 360 AI Teams Plan includes award-winning course authoring apps, **Rise** and **Storyline**, with integrated **AI Assistant**, plus:

- ✓ Distribute training faster with **Reach**—no LMS headaches, no delays
- ✓ Streamlined web-based feedback with **Review**—no download or license needed
- ✓ **Content Library** with **23 million+** assets, including images, video, icons, and course templates

Add **Localization** to your plan to cut your global course authoring timeline by two-thirds.

Why the world's top organizations trust Articulate 360

AI built in, not bolted on

Create better courses up to nine times faster with AI that's trained and built for course authors and learning best practices. Upload source documents or start with a simple prompt to generate entire draft courses. Stay in control while you brainstorm, iterate, and refine effective, interactive training faster than ever.

Beautiful on any device

Craft a consistent learner experience, every time. With Articulate 360's responsive design capabilities, courses look great on any device—mobile, tablet, or desktop.

Intuitive and powerful

With Articulate 360, anyone on your team can make engaging training. From quick-hit content to immersive simulations, Articulate 360 empowers creators of all skill levels with tools that are simple to start and sophisticated enough to scale.

Accessibility-focused

Articulate 360 includes robust accessibility features such as keyboard navigation, screen reader support, and customizable closed captions that broadly support WCAG and Section 508 accessibility standards.

Learning, fueled by community

Join E-Learning Heroes (ELH), a vibrant community of 1.5 million e-learning pros. Connect with peers, learn new skills, and grow your career with thousands of inspiring and helpful resources.

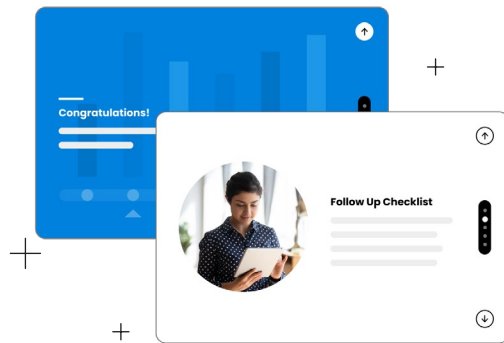

**More than 5.5 million courses
built annually with Articulate**

“I have been amazed at the quality of products we have been able to create with Articulate and how fast we have been able to create them.”

—Michael p Galbincea, Manager of Education Products,
Institute of Food Technologists

Top-rated by users and industry experts

Choosing Articulate 360 is not just about selecting a new authoring platform.

For Captivate users, the bigger opportunity is building a learning creation workflow that is easier to adopt, easier to manage and easier to scale across the team.

As an official Articulate partner, Omniplex Learning helps organisations get more value from Articulate 360 through practical support before, during and after adoption.

Support areas:

- **Licensing and platform guidance**

Helping you understand the right Articulate 360 setup for your team, use cases and wider learning ecosystem.
- **Onboarding and adoption support**

Supporting your team as they move from existing ways of working into a more scalable Articulate workflow.
- **Certified Articulate training**

Building confidence across Rise, Storyline, Review and wider platform capabilities, so usage is not limited to a few confident creators.
- **Workflow and governance advice**

Helping teams define content standards, review processes, roles, reusable assets and scalable ways of working.
- **Bespoke content support**

Providing expert content creation support where your team needs additional capacity or specialist build expertise.
- Ready to explore what this could look like for your team?**
