About OL

At Omniplex Learning, we are committed to empowering organisations to achieve the best possible outcomes from their learning and development initiatives.

Our comprehensive solutions include authoring tools, LMS solutions, digital adoption, content creation, training, and professional service. These are designed to provide continuous support at every stage of the L&D journey.

We proudly partner with global leaders, Articulate, CYPHER Learning, Docebo, and Vyond, reinforcing our status as a trusted ally in the industry.

Drawing on our extensive expertise and knowledge, we bring unparalleled insights and innovative solutions to our clients.

Our deep understanding of the industry allows us to tailor our services to meet the unique needs of each organisation, ensuring they have the tools and support necessary to succeed

Course overview

Designed and delivered by our experts, this one-day course combines short demonstrations with hands-on activities to help participants build confidence using the AI Assistant in Storyline and Rise.

The format focuses on practical application, giving designers the space to experiment, build quickly, and understand where AI fits into their workflow without replacing instructional design expertise.

Throughout the day, participants will learn how to use AI to accelerate scenario drafting in Storyline and create interactive content in Rise, including custom code block interactions.

By the end of the course, participants will understand where AI adds value, when to rely on their own expertise, and how to use simple prompt patterns to support their day-to-day work.

Core Objectives:

01

Create a short Storyline scenario using the AI Assistant to generate dialogue, choices and consequences.

02

Build responsive interactions in Rise using AI-generated code blocks and structured prompts.

03

Apply prompt patterns to generate content, refine outputs and support course development.

Course details

Audience:

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Course dates:

Check our website for the latest dates.

Format and delivery:

Our sessions are instructor-led, virtual and in-person.

Agenda

01

Using AI as a design partner

Understand how AI supports learning design and decisions while keeping designers in control.

- Analyse where AI adds value across the design workflow
- Evaluate common barriers and opportunities in AI-supported L&D
- Apply instructional design thinking when working with AI

02

Structuring prompts for learning workflows

Develop prompts that translate learning intent into clear, usable AI outputs.

- Translate learning objectives into structured prompts
- Create reusable prompt patterns for consistent outputs
- Refine outputs through simple, structured iteration

03

Storyline AI Assistant

Use AI Assistant in Storyline to generate content and accelerate early drafting.

- Create on-screen text and scenarios using structured prompts
- Refine scenario choices to support clear learning outcomes
- Apply prompts to support accessible, well-structured interactions

04

Building interactions in Rise

Use AI and code blocks to build responsive, interactive components in Rise.

- Interpret AI-generated HTML, CSS and JavaScript for use in Rise
- Embed custom HTML code to create tailored interactions
- Build responsive, learner-driven interactions using AI-supported code

05

Reviewing & refining

Apply structured review approaches to improve quality and consistency when using AI.

- Guide AI outputs using prompts that support accessibility needs
- Test interactions for mobile responsiveness and usability
- Evaluate content against instructional design and accessibility standards

Pre-requisites

The training session is designed for a variety of skill levels. All participants should have basic computer skills and familiarity with some of the more common user interfaces, such as PowerPoint.

The training session is interactive and hands-on. Therefore, participants are required to have the latest version of Articulate Storyline 360 installed with the latest version on their PC or Mac (Mac with a Windows Interface E.g. Parallels), or the Articulate 360 free trial.

All attendees will need:

- The latest version of Storyline 360 installed and ready to use
- Check [your system requirements](#) to guide you on what you need
- For virtual training, we recommend two screens for an optimum learning experience

Why train with us?

Training isn't just about building skills – it's about helping people feel confident, capable, and inspired to do their best work.

Our courses are designed to meet learners where they are, giving them the space, support, and encouragement they need to grow. Every session is live, interactive, and hands-on, so people can ask questions, practise new techniques, and learn alongside others who share the same challenges. We focus on real-world application, not theory, so learners leave feeling ready – not just informed. And because all our programmes are shaped by decades of experience and backed by trusted accreditations, you can be sure your teams are receiving training that genuinely supports their development.

Learn from experts:

Course content developed and delivered by top experts with 80+ years of combined experience

Post-training support:

We're still here after the session – ready with resources, answers and guidance to support your continued learning journey.

Accredited & trusted:

Every learner walks away with recognised certifications or diplomas showcasing their skills and progress professionally.

Live, instructor-led learning:

Hands-on sessions, led by certified trainers that include peer-to-peer engagement and live feedback.

“Saffy was absolutely fantastic. The session was ran so professionally, with lots of patience and allowed time to practice. She was able to accommodate our different needs (timing, pace etc.) The course also provided many resources to aid us in building accessible courses using the Articulate tools, and other best practices.”

**SENIOR TRAINING AND EDUCATION MANAGER,
VISIT BRITAIN/ VISIT ENGLAND**

“Brilliant training, very engaging and useful with a good mix of instruction and activity. The training was well-presented and I liked that discussion was encouraged – it was really good that Saffy encouraged and allowed time for this.

Thank you very much for enjoyable and valuable sessions, thank you!”

VYOND

Vyond

Vyond training sessions designed for a variety of skill levels. Capturing the attention of today's 'always-on', mobile-first learners is a challenge felt by digital learning professionals globally. Vyond gives everyone, of all skill levels and industries, the capabilities to create dynamic and powerful media.

Diploma in Instructional Design

An ITOL accredited diploma to master the art of creating memorable learning experiences. Unpack evidence based learning theories, proven frameworks and powerful tools to transform your digital learning content. It's the perfect opportunity to level up your skills and earn an industry-recognised diploma.

Diploma in Visual Design

Effective visual design can help you clearly communicate ideas, guide learners through material and accelerate knowledge retention. These visuals can be the difference between gaining their full attention or losing their focus instantly. Master effective design principles and equip yourself with proven methods for creating professional and impactful visuals in a range of formats from eBooks to PowerPoints.
